Phase 3 efforts primarily involve installing 8 additional flange magnetic meters on the water side of the highest use siphons, with at least one flow meter on each island. MWD has purchased the equipment and set up a bid process for equipment installation.
Since the last update, MBK conducted a field visit to Bouldin Island to conduct portable flow meter tests at siphons running for winter flooding. Tests at Siphons No. 39 and 40 confirmed that telemetry will be required at these siphons for strict compliance with the Measurement Regulation. MBK also checked existing equipment and downloaded data from existing equipment. No new issues with the equipment were observed during the field visit.
Current direction by MWD is to proceed with a combination of strict compliance and developing a MWD Alternative Compliance Plan. In order to develop this plan, MWD submitted a Request for Additional Time on December 21, 2020. MWD was notified by the Office of the Delta Watermaster on December 29, 2020 that the Request was accepted.
Development of the Delta-wide ACP by the Delta Measurement Experiment Consortium to utilize Open ET for measuring and reporting diversions continues. MBK and MWD will continue to participate in the Consortium and provide feedback on the future development of this ACP as needed. The next Consortium meeting is scheduled for January 28, 2021.
